

4 Principles of Human Centered Design

2 Find the Root Problem

- What consumer needs are not being met?
- Filter symptoms of the problem from the root problem
- Brainstorm and think outside the box

4 Small Interventions

- Learn from feedback
- Make small changes at first. Analyze, and see what can be done different
- Repeat with small changes.

1 Be People Centered

- Collect data and observe
- Focus on the people who are using the product
- What needs do consumers have?

3 Everything is a System

- Evaluate Brainstorming Ideas
- Create Prototypes
- Test product with users
- Analyze Feedback
